

Sir Syed Medical College

Bangladesh • Established 1875 • Government

NMC-Approved

ABOUT THE UNIVERSITY

Overview Sir Syed Medical College is a public medical institution located in Bangladesh. Established in 1875, it is one of the older institutions in the region, providing a long-standing academic environment for medical aspirants. For Indian students, the MBBS programme is conducted over a duration of 6 years, with English serving as the medium of instruction, which helps in easing the transition for those planning to return to India for practice. One of the primary advantages of studying here is the presence of a teaching hospital. Having an integrated teaching hospital is essential for medical students, as it allows for the practical application of theoretical knowledge through direct patient interaction and clinical rotations.
